**Subject: APA2021 – Comments to public consultation from Vår Energi AS**

Thank you for the invitation to comment on the proposed extension of APA 2021 acreage,  
dated 25.02.2021.

Vår Energi AS strongly support the proposed extension of APA acreage.

New exploration acreage is important to secure reserve replacement, production and general  
activity level on the NCS.

The APA is the most important mechanism for Vår Energi to secure this activity. The  
predictability and yearly extension of the acreage is excellent for long time planning.
